Improving Water Sector Reform in Sierra Leone

13 June 2017

SMEC has been engaged to provide consultancy services for physical mapping, distribution system conditions assessment and hydraulic modelling to the Guma Valley Water Company (GVWC) in Sierra Leone.

This project is part of the Water Sector Reform Project Threshold Program with the Government of Sierra Leone, which is designed to: improve water sector coordination; strengthen commercial practices, operational independence and planning capacity at the GVWC; and enhance transparency, accountability and customer service practices.

Project scope of work includes: project management and reporting; physical mapping of water infrastructure and associated infrastructure; water infrastructure condition assessments; implement health and safety systems and hydraulic modelling.

SMEC’s consultancy services will be implemented under the supervision of the Millennium Challenge Coordinating Unit, an independent unit established by the Government of Sierra Leone for the purposes of administering all contracts and grants related to the program.
