SMEC Wins Preliminary Design Contract in South Africa

13 October 2016

SMEC has been appointed as Preliminary Engineering Services Designer for the Tinley Manor South Banks Development by Tongaat Hulett Developments in KwaZulu-Natal, South Africa.

The project comprises 437 hectares of mixed use development located on the North Coast of KwaZulu-Natal, with the majority of the project site currently used for sugar production. The Development includes tourist, resort, leisure and recreational facilities, requiring new road and service infrastructure.

The Tinley Manor South Banks Development will increase economic growth and tourism through commercial and residential development, which will facilitate new forms of urban development, choices and lifestyle options in the area.

SMEC's responsibilities include the preliminary design of earthworks, roadways, storm water and sewage infrastructure, and water reticulation.
