SMEC to Implement Resettlement Action Plan in Malawi

01 June 2016

SMEC has signed a contract with Millennium Challenge Account-Malawi (MCA-Malawi) for the development and implementation of a Resettlement Action Plan in relation to Malawi’s Infrastructure Development Project (IDP).

This Project is part of a compact developed by MCA-Malawi which aims to benefit one million people, by providing investments for projects in the power sector in order to: increase the availability, reliability, and quality of power; stimulate economic growth; and reduce poverty.

The IDP will rehabilitate, upgrade and modernise the Electricity Supply Corporation of Malawi’s (ESCOM) generation, transmission and distribution assets. This will improve transmission capacity, and increase the efficiency and sustainability of hydropower generation.

SMEC previously developed the Resettlement Action Plan (RAP) for the IDP. The RAP is divided into four lots according to location. SMEC has been engaged to implement the RAP for lots 1 and 2.
