SMEC Secures Major Gas Field Installation in Bangladesh

4 January 2016

SMEC, in association with ILF Germany, has been appointed by the Bangladesh Gas Fields Co. Ltd. (BGFCL) as Engineering Consultant for the installation of compressors at BGFCL’s Titas Location C and Narsingdi Gas Fields Project in Bangladesh.

Funded by the Japanese International Cooperation Agency (JICA), this project will comprise the basic and detailed engineering, procurement, installation, commissioning and testing of gas compressor units and associated facilities. This will include the installation of reciprocating gas-driven engine compressors in accordance with American Petroleum Institute (API) standards.

The SMEC-ILF Germany Joint Venture (JV) will act as Owner’s Engineer for the project. Services will include: basic and detailed engineering; selection of Engineering, Procurement, Construction and Commissioning (EPCC) bidders through a prequalification process; initiation of EPCC proposals; detailed design review; project management; and construction and commissioning supervision.
