SMEC Wins Contract for Newcastle Light Rail Project, Australia

6 December 2016

SMEC has been engaged by Transport for New South Wales (TfNSW) as Independent Certifier (IC) on the Newcastle Light Rail project.

The project will offer a high capacity transport, which will help cut congestion and provide a frequent, reliable and comfortable travel option through the city centre.

SMEC will provide IC services for all works required for the Newcastle Light Rail project as part of the Newcastle Urban Transformation and Transport Program, which aims to revitalise the city centre.

An overview and concept fly-through of the project is provided on the Revitalising Newcastle website:
