SMEC Assesses Feasibility of Elevated Expressways in Bangladesh

7 April 2016

SMEC and Associated Consulting Engineers (ACE Consultants), a SMEC subsidiary, have been awarded a contract by the Bangladesh Bridge Authority to conduct a feasibility study for two four-lane expressways (including flyovers) in Dhaka: the 24 km Dhaka-Ashulia Elevated Expressway; and the 80 km East-West Elevated Expressway.

The feasibility study will focus on construction of the proposed expressways, and will address techno-economic considerations, environmental sensitivity and community acceptance.

SMEC’s services will include: detailed survey, investigation and preliminary design; financial analysis; cost estimation; social analysis (including preparation of a Land Acquisition Plan and Resettlement Action Plan); and environmental and economic analysis.
