SMEC Awarded Sydney Trains’ Major Works Central Hub

28 January 2016

SMEC has been engaged by Sydney Trains as Client Engineer for a new Major Works Central Hub facility in Clyde, New South Wales. This Central Hub will comprise a five-storey office building and a two-storey amenities building (with a total floor area of 13,400 m²).

This Major Works Central Hub forms part of Sydney Trains’ ongoing Major Works Reform Strategy. The objective of this reform is to deliver organisational facilities, structures, systems and processes that: drive ongoing improvements to safety, reliability and efficiency; introduce best practice processes; and accommodate the restructuring of the Sydney Trains Major Works Division’s operating model.

SMEC’s services will include: technical review of tender submissions; start-up, liaison and technical meetings; design review of all design works packages; monthly inspections and progress meetings; site attendance at Inspection and Test Plan (ITP) points; review and response to Requests for Information (RFI); commissioning of works; and review of operation and maintenance plans.
