

SJ Group opens new office in Jakarta to support market expansion and long-term growth

Strengthens multidisciplinary collaboration across SJ entities

Reflects continued growth across infrastructure, energy, urban development and environmental sectors

Continues five-decade legacy and ongoing commitment in Indonesia

Jakarta, Indonesia, 12 June 2025 – Singapore-headquartered SJ Group (SJ) is opening a new consolidated office in Blok M, Jakarta. This milestone marks a significant step in unifying its operations in Indonesia and strengthening integrated, multidisciplinary collaboration under one roof.

SJ has been operating in Indonesia for over 50 years through SMEC, an SJ company that has played a pivotal role in delivering transformative infrastructure projects across transport, energy, water, and urban development for both the private and public sectors. Contributing to more than 200 projects, SMEC has worked across Public-Private Partnerships (PPPs) as well as managed large programmes across Indonesian and regional government partners.

"We've brought the SJ team together under one roof in Blok M, a space that reflects how we work today: connected, collaborative and future-focused. It's a demonstration of our commitment to Indonesia, and it gives us the room to grow, create and support our clients as the country builds for the future." — Sean Chiao, Group CEO, SJ.

SJ's ongoing initiatives in Indonesia reflect its commitment to sustainability, innovation and long-term impact. In West Java, SJ is supporting the TPPAS Greater Cirebon regional waste management programme — a transformative project serving five municipalities through advanced treatment technologies, climate resilience planning and circular economy principles. In South Sulawesi, SJ (through SMEC) is delivering feasibility studies for floating solar PV installations across three sites, supporting Indonesia's energy transition and low-carbon ambitions.

With a presence built over decades, SJ continues to deliver end-to-end advisory for infrastructure, industrial and township development across the country. Notable projects include Kediri Airport in Surabaya, one of Indonesia's first airports delivered via PPP, where SJ led feasibility studies, PPP structuring and project management. Other developments include a 58-hectare integrated township in West Sumbawa, and Subang Smartpolitan in West Java, a 2,700-hectare smart city development combining residential, commercial and industrial zones.

Through Mitbana, its joint venture with Mitsubishi Corporation, SJ is also shaping future-ready communities in Greater Jakarta. Mitbana is co-developing Hiera, a 108-hectare mixed-use precinct in BSD City with Sinar Mas Land, and Green Bestari Park, a 51-hectare transit-oriented township in Tangerang with Intiland.

##

About SJ

SJ is a diverse collective of problem solvers for the built environment, continually reimagining ways to create a smart and sustainable future.

Headquartered in Singapore, the group has a global talent pool of 16,000 in its member companies AETOS, Atelier Ten, B+H, CHIL, KTP, Prostruct, Robert Bird Group, SAA, SMEC and Surbana Jurong, based in more than 120 offices in over 40 countries. They include architects, designers, planners, engineers, facilities managers and other specialists driven by progressive thinking and creative ideas to shape a better future.

Its technical experts deliver sustainable solutions that cover the entire project life cycle from planning and design, through to delivery and management, as well as a full suite of multidisciplinary consultancy services across a diverse range of sectors including transportation, water, aviation, healthcare, hospitality and renewables.

A global urban, infrastructure and managed services consulting firm with over 70 years of track record in successful project delivery, SJ has built more than a million homes in Singapore, created master plans in more than 60 countries and developed over 100 industrial parks globally.

SJ is #23 in Engineering News-Record's 2024 Top 225 International Design Firms and #17 in World Architecture 100 2025.
